

manual workstation

the perfect starter solution
for a complete system.

In the illustration example:
dos workstation + dos piston + dos feed C

economic and space-saving

Manual workstations offer an ideal starter solution for manual dispensing. Compared to automated dispensing systems, the manual system is a cost-effective and space-saving variant with high dispensing quality.

Depending on the type of material and dispensing quantity, the manual solution can be flexibly combined with various dispensers and material feeding systems.

- **Manual dispensing system**
- **Applications with a wide range of materials**
- **Easy handling and operation**
- **Excellent price/performance ratio**
- **High quality dispensing results**

the possible combinations manual workstation

kinematic

+

dispenser

+

material preparation

dos workstation

Manual stand solution for dispensing applications.

+

dos piston

Material potting from 0.1 to 106 ml for abrasive and non-abrasive materials.

+

dos screw

Spot dispensing from 15 µl and continuous bead application.

dos feed C

Transport of materials in cartridges from a viscosity of 70,000 mPa·s.

dos prep light

Preparation and feeding of materials up to a viscosity of 70,000 mPa·s with a fill volume of 0.5 to 3 liters.

dos prep

Preparation and feeding of materials up to a viscosity of 70,000 mPa·s with a fill volume of up to 60 liters.

dos feed H

Transport of materials in hobbocs from a viscosity of 70,000 mPa·s.

sample offer

Pos.	Quantity	Description
1	1,00	Dispenser dos piston M 2C
2	2,00	Material preparation dos feed C 6 oz.
3	1,00	Control element dos control
4	1,00	Kinematic dos workstation (Stand)
5	1,00	Control panel 12 inch
6	1,00	Foot pedal
Total price		24.990,00 €
